3) **DESCRIPTION:**

I. HISTORY, PRESENT BUSINESS & BACKGROUND OF THE PORTFOLIO MANAGER:

History of DRChoksey Group

DRChoksey Group has been at the forefront of client investments and servicing for over four decades. Established by the visionary promoter, Deven Choksey, the group has expanded its footprint through DRChoksey Wealth, encompassing Wealth Management and Investment Advisory services. The wealth division is dedicated to addressing the investing and wealth management needs of a diverse clientele, including individual investors, High Net Worth Individuals (HNIs), Family Offices, and Institutions.

Promoter Deven Choksey, along with other proficient directors, brings unparalleled expertise in client management, facilitating wealth creation and growth. Their comprehensive approach spans higher returns, asset protection, retirement planning, and legacy planning.

DRChoksey Wealth offers a wide array of investment goals and advice, leveraging financial instruments such as mutual funds, stocks, trading, insurance, and research-backed investment ideas. The core team at DRChoksey boasts over 40 years of expertise in stock research, investment advisory, and the broking space, ensuring robust and informed decision-making.

The group's focus extends beyond merely growing and managing wealth; it encompasses securing financial well-being for future generations as well.

Major Events

A significant milestone in the group's history was the demerging of the KRChoksey group's broking and wealth management business. This demerger led to the establishment of a new entity, DCFPL, which included the migration of customers and employees, thus streamlining the focus on wealth management.

Present Activities

Currently, DRChoksey Group stands as a premier Wealth Management and Investment Advisory brand, catering to a broad spectrum of clients. These include individual investors, institutional investors from both India and overseas, family offices of corporates, HNIs, Ultra High Net Worth Individuals (UHNI's), professionals, and mass affluent investors. The group's strategy hinges on combining research with advisory services to build and sustain wealth for its investors.

DCFPL, a SEBI-registered portfolio manager, offers comprehensive services to both residents and Non-Resident Indians (NRIs), including discretionary, non-discretionary, and PMS advisory services. This regulatory compliance ensures a high standard of service and trust for clients seeking custom-made wealth management solutions.

II. BACKGROUND OF PROMOTERS & DIRECTORS OF THE PORTFOLIO MANAGER:

Deven Ramesh Choksey

II. Details of the services being offered: Discretionary /Non-discretionary /Advisory Services

1) DISCRETIONARY - PORTFOLIO MANAGEMENT (DPM).

In this product funds will be managed by DCFPL PMS , on behalf of its clients on discretionary basis. It shall be the endeavor of DCFPL PMS to maximize returns for its clients, in consonance with the client risk profile. Here funds will be predominantly invested in Equities. However, the Portfolio Manager may invest funds in debts, government securities, derivative instruments, units of mutual funds, money market Instruments, Exchange Traded Fund as per the risk profile of the customer, depending upon the circumstances and the needs of time.

2) NON-DISCRETIONARY PORTFOLIO MANAGEMENT (NDPM)

The funds will be under the control of the PMS client and the Portfolio Manager shall try to maximize the return for its clients by providing Non-discretionary services to the PMS Client. The client will take the buy/sale / hold decision and the return on these investments will largely depend on the acceptance of advisory services and implementation thereof, by the client.

3) Advisory Services

The Portfolio Manager will provide advisory portfolio management services, in terms of the SEBI (Portfolio Managers) Regulations 2020, which shall be in the nature of investment advisory and shall include the responsibility of advising on the portfolio strategy and investment and divestment of individual securities on the clients portfolio, for an agreed fee structure and for a defined period, entirely at the Client's risk. The advisory services shall be provided to all eligible categories of investors who can invest in Indian market including NRIs, FIIs, etc.

The Portfolio Manager shall be solely acting as an advisor to the portfolio of the client and shall not be responsible for the investment / divestment of securities and / or an administrative activity on the client's portfolio. The Portfolio Manager shall provide advisory services in accordance with

such guidelines and/ or directives issued by the regulatory authorities and /or the Client, from time to time, in this regard.

The Portfolio Manager shall not in any event and at any point of time be responsible in any manner whatsoever for any investment decision taken by the Client on the basis of the investment advice provided by the Portfolio Manager. The Portfolio Manager may act upon any in-house research, commercially available databases & news services, external meetings and visits, third-party & broker research reports, publicly available information etc. Neither the Portfolio Manager nor any of its affiliates (nor any of their respective control persons, directors, officers, employees or agents) shall be liable to the Client or to any other person claiming through the Client for any claim, loss, damage, liability, cost or expense suffered by the Client or any other person arising out of or related to the advisory services provided therein.

III. MINIMUM INVESTMENT AMOUNT

Pursuant to SEBI regulation dated 16th January 2020, the minimum amount to be invested under the portfolio is Rs.50,00,000/- (Rupees fifty lakh only) unless specified otherwise. The Portfolio Manager shall communicate the minimum investment amount for different portfolios / products from time to time. The minimum investment amount per client shall be applicable for new clients and fresh investments by existing clients.

The investment objectives of the portfolios of the Clients depending on the Clients' needs would be one or more of the following or any combination thereof:

II. Investment Approaches

Client will offer the following Investment Approaches of the Portfolio Manager

Name of Investment Approach	DRChoksey – Diversified Equity
Investment objective	To generate long-term capital growth from an actively managed portfolio of equity and equity-related instruments, primarily focusing on large-cap stocks.
Description of types of securities	Equity or debt, listed or unlisted, convertible instruments, etc Including Equity and Equity-related instruments, primarily in large-cap stocks.
Basis of selection of such types of securities as part of the investment approach	The stock selection process focuses on large-cap stocks that offer stable returns with lower volatility. The fund employs a top-down investment approach, initially identifying promising industries/sectors and then selecting investment candidates within those sectors.
Allocation of portfolio across types of securities*	The portfolio is allocated predominantly (80-90%) to large-cap stocks, with the possibility of marginal exposure to mid-cap and small-cap ideas based on the fund manager's discretion.
Appropriate benchmark to compare performance and basis for choice of benchmark	Nifty50 TRI The appropriate benchmark for comparing performance is chosen based on factors such as market capitalization, industry sector, and investment horizon.
Indicative tenure or investment horizon	focused on long-term capital growth.
Risks associated with the investment approach	Risks associated with this approach may include market risk, sector-specific risk, and volatility in equity markets
Other salient features, if any	Surplus funds may be temporarily invested in money market instruments until deployed in equity investments

Name of Investment Approach	DRChoksey -Alpha Invest
Investment objective	To generate long-term capital growth from an actively managed portfolio of equity and equity-related instruments for both resident and non-resident clients.
Description of types of securities	Equity or debt, listed or unlisted, convertible instruments, etc Including Equity and Equity-related instruments, primarily in large-cap stocks.
Basis of selection of such types of securities as part of the investment approach	Securities are selected based on their business formation, track record, and dividend payout performance, employing a bottoms-up investment approach to identify promising investment opportunities.
Allocation of portfolio across types of securities*	The portfolio is allocated across different capitalization segments, leveraging the Alpha Invest Cap approach to benefit from risk diversification.
Appropriate benchmark to compare performance and basis for choice of benchmark	Nifty50 TRI The appropriate benchmark for comparing performance is chosen based on factors such as market capitalization, industry sector, and investment horizon.
Indicative tenure or investment horizon	Focused on long-term capital growth.

Risks associated with the investment approach	Risks associated with this approach may include market risk, sector-specific risk, and volatility in equity markets.
Other salient features, if any	Surplus funds may be temporarily invested in money market instruments until deployed in equity investments.

Name of Investment Approach	DRChoksey - Select Multiplier
Investment objective	To generate short to medium-term capital growth from an actively managed portfolio of equity and equity-related instruments.
Description of types of securities	The portfolio includes liquid counters and equity-related instruments that have the potential to deliver superior risk-adjusted returns.
Basis of selection of such types of securities as part of the investment approach	Securities are selected based on their liquidity, potential for superior risk-adjusted returns, and technical and quantitative analysis. The strategy also incorporates contrarian principles while adhering to fundamental investment principles of buying low and selling high.
Allocation of portfolio across types of securities*	The portfolio allocation aims to generate alpha by utilizing a mix of technical strategies, providing investors with exposure to short to medium-term momentum and flow-driven ideas
Appropriate benchmark to compare performance and basis for choice of benchmark	S&P BSE 500 TRI The appropriate benchmark is chosen considering factors such as liquidity, risk-adjusted returns, and the investment horizon of short to medium term.
Indicative tenure or investment horizon	Focused on short to medium-term capital growth
Risks associated with the investment approach	Risks associated with this approach may include market volatility, liquidity risk,
Other salient features, if any	Surplus funds may be temporarily invested in money market instruments until deployed in equity investments

Name of Investment Approach	DRChoksey - Focused Advantage
Investment objective	To preserve capital and generate long-term capital growth from an actively managed portfolio of equity and equity-related instruments for both resident and non-resident clients.
Description of types of securities	The portfolio includes equity and equity-related instruments across various sectors and market cap categorizations.
Basis of selection of such types of securities as part of the investment approach	Securities are selected based on a hybrid approach combining top-down and bottom-up analysis. The investment philosophy relies heavily on GARP (Growth at a Reasonable Price).
Allocation of portfolio across types of securities*	The portfolio consists of stocks from various sectors and market cap categorizations to achieve optimal diversification.
Appropriate benchmark to compare performance and basis for choice of benchmark	Nifty50 TRI The appropriate benchmark is chosen based on factors such as market dynamics, sector performance, and investment horizon.
Indicative tenure or investment horizon	long-term capital growth, aligning with the needs of family offices.
Risks associated with the investment approach	market risk, sector-specific risk.

Other salient features, if any	Surplus funds may be temporarily invested in money market instruments until deployed in equity investments.
--------------------------------	---

Name of Investment Approach	DRChoksey – MidaS Portfolio
Investment objective	To generate long-term capital growth from an actively managed portfolio of equity and equity-related instruments, primarily focused on the mid and small-cap space with a minority allocation to large-cap stocks.
Description of types of securities	The portfolio includes equity and equity-related instruments, with a focus on small and mid-cap stocks along with a minority exposure to large-cap stocks
Basis of selection of such types of securities as part of the investment approach	Securities are selected based on a hybrid investment approach of top-down and bottom-up research. The selection process begins with identifying promising industries/sectors and then selecting investment candidates within those sectors.
Allocation of portfolio across types of securities*	The portfolio allocation is predominantly (70-80%) in mid and small-cap stocks, with a minority allocation to large-cap stocks.
Appropriate benchmark to compare performance and basis for choice of benchmark	Nifty50 TRI The appropriate benchmark is chosen based on factors such as market dynamics, sector performance, and risk-adjusted returns, considering the portfolio's focus on mid and small-cap stocks.
Indicative tenure or investment horizon	long-term capital growth, aligning with the objective of generating high-risk-adjusted returns.
Risks associated with the investment approach	market risk, sector-specific risk in mid and small-cap stocks.
Other salient features, if any	Surplus funds may be temporarily invested in money market instruments until deployed in equity investments

III. Policies including the types of securities in which Portfolio Manager generally invests/ will generally invest: The same shall be always subject to the scope of investments as agreed upon between the Portfolio Manager and the Client in the Agreement.

IV. Policies for investments in associates/ group companies of the Portfolio Manager and the maximum percentage of such investments therein subject to the applicable laws / Regulations/ Guidelines.

The Portfolio Manager will, before investing in the securities of associate/ group companies, evaluate such investments, the criteria for the evaluation being the same as is applied to other similar investments to be made under the Portfolio. Investments under the Portfolio in the securities of the group companies will be subject to the limits prescribed in the Agreement (if any) executed with the respective Client and the same would be subject to the applicable laws/regulations/guidelines.

- **Investment in the securities of associates/related parties of Portfolio Manager.**

Sr. No.	Investment Approach, if any	Name of the associate/related party	Investment amount (cost of investment) as on last day of the previous calendar quarter (INR in crores)	Value of investment as on last day of the previous calendar quarter (INR in crores)	percentage of total AUM as on last day of the previous calendar quarter
NIL					

6) Details of Diversification Policy and the details of investment of clients's fund in the securities of its related parties or associates.

Portfolio diversification is a strategy of risk management used in investing, which allows to reduce risks by allocating the funds in multiple asset types. It helps to mitigate the associated risks on the overall investment portfolio.

The Portfolio Manager shall focus through a collection of core holdings and may or may not seek diversification across the various sectors of the equity market. Securities shall be chosen amongst a wide spectrum of market capitalizations, from SME to large capitalization equities. However, from time to time on opportunistically basis, may also choose to invest in money market instruments, units of mutual funds, ETFs or other permissible securities/products in accordance with the Applicable Laws. The Portfolio Manager may also, from time to time, engage in hedging strategies by investing in derivatives and permissible securities/instruments as per Applicable Laws. For investments in securities of Associates/ Related Parties, the Portfolio Manager shall comply with the following:

The Portfolio Manager shall invest up to a maximum of 30% of the Client's AUM in the securities of its Associates/Related parties. The Portfolio Manager shall ensure compliance with the following limits:

Security	Limit for investment in single associate/related party (as percentage of client's AUM)	Limit for investment across multiple associates/related parties (as percentage of client's AUM)
Equity	15%	25%
Debt and hybrid securities	15%	25%
Equity + Debt + Hybrid securities	30%	

*Hybrid securities includes units of Real Estate Investment Trusts (REITs), units of Infrastructure Investment Trusts

(InvITs), convertible debt securities and other securities of like nature.

The aforementioned limits shall be applicable only to direct investments by Portfolio Manager in equity and debt/hybrid securities of its Associates/Related parties and not to any investments in the Mutual Funds. With respect to investments in debt and hybrid securities, the Portfolio Manager shall ensure compliance with the following:

Under discretionary portfolio management services, the Portfolio Manager shall not make any investment in unrated and below investment grade securities.

Under non-discretionary portfolio management services, the Portfolio Manager shall not make any investment in unrated below investment grade listed securities.

However, Portfolio Manager may invest up to 10% of the assets under management of such clients in unlisted unrated securities of issuers other than associates/related parties of Portfolio Manager. The said investment in unlisted unrated debt and hybrid securities shall be within the maximum specified limit of 25% for investment in unlisted securities as per the PMS Regulations.

7) RISK FACTORS:

a) General Risk Factors

- Securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Portfolio will be achieved.
- Past performance of the Portfolio Manager or any of its Group/ Global Associate Companies do not indicate the future performance of the portfolio.
- Investors are not being offered any guaranteed or assured return/s i.e. either of principal or appreciation on the portfolio.
- The names of the product/Portfolio do not in any manner indicate their prospects or returns. The various factors which may impact the value of the portfolio investments include, but are not limited to, fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc.
- Investors may note that Portfolio Manager's investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends.

b) Market Risk:

Securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Portfolio will be achieved. The valuation of the portfolio's investments, may be affected generally by factors affecting securities markets, such as economic activity, price and volume volatility in the capital markets, interest rates, currency exchange risk, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. There will be no prior intimation or prior indication given to the Clients when the composition/ asset allocation pattern changes.

The securities that the Portfolio Manager invests in would be exposed to price changes on a day-to-day basis. These price changes may occur due to instrument specific factors as well as general macroeconomic conditions.

Markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The Portfolio may be subject to price volatility due to factors such as interest sensitivity, market perception, and creditworthiness of issuer and market liquidity.

Different parts of the market can react differently to these developments. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Portfolio. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio Manager to make intended securities purchases due to settlement problems could cause the Portfolio to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the portfolio due to the absence of a well-developed and liquid secondary market would result, at times, in potential losses to the Portfolio, in case of a subsequent decline in the value of securities held in the Portfolio.
- The Portfolio Manager may, considering the overall level of risk of the portfolio, invest in lower rated securities offering higher yields. This may increase the risk of the portfolio. Such investments shall be subject to the scope of investments as laid down in the Agreement.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. This may increase the risk of the portfolio. Such investments shall be subject to the scope of investments as laid down in the Agreement.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market securities & fixed income securities lack a well-developed secondary market, which may restrict the selling ability of the Portfolio and may lead to the investment incurring losses till the security is finally sold.
- The Portfolio Manager may, subject to authorisation by the Client in writing, participate in securities lending. The Portfolio Manager may not be able to sell / lend out securities, which can lead to temporary illiquidity. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

c) **Concentration Risk:**

The scheme may pursue only a limited degree of diversification. It may invest a greater proportion of assets in the securities of very few issuers (within the limits permitted by regulation) (e.g. only 5 corporate bond issuers) and/or be concentrated on only one or a few market sectors. This could have negative implications on the performance of the scheme. The scheme may be more sensitive to economic, business, political or other changes and this may lead to sizeable fluctuation in the Net Asset Value of the scheme.

d) **Liquidity Risk:**

The liquidity of the Portfolio's investment is inherently restricted by trading volumes in the securities in which the Portfolio invests.

A lower level of liquidity affecting an individual security or derivative or an entire market at the same time, may have an adverse bearing on the value of the Portfolio's assets. More importantly, this may affect the Portfolio's ability to sell particular securities quickly enough to minimise impact cost, as and when necessary to meet requirements of liquidity or to sell securities in response to triggers such as a specific economic/corporate event.

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few or all of the investments and may affect the liquidity of the investments of the Portfolio.

The Portfolio may be unable to implement purchase or sale decisions when the markets turn illiquid, missing some investment opportunities or limiting ability to face redemptions. The lack of

liquidity could also lead to the risk that the sale price of a security could be substantially lower than the fair value of the security.

e) Risk associated with investing in equities:

The risks associated with investments in equities (and similar instruments) include significant fluctuations in prices. The impact of fluctuations is likely to be accentuated for short-term investments. The risk that the performance of one or more companies declines or stagnates may have a negative impact on the performance of the Portfolio as a whole at any given time.

Stock markets are volatile and can decline significantly in response to political, regulatory, economic, market and stock-specific developments etc. Different parts of the market can react differently to these developments. The stock-specific volatility may also change over a period of time as the characteristic of the stock undergoes a change in terms of market-cap category. The Portfolio may hold such securities for only a very short time, which could tend to increase the costs.

The Portfolio may invest in growth stocks which may be more volatile than the market in general and may react differently to economic, political and market developments and to specific information about the issuer. Growth stocks traditionally show higher volatility than other stocks, especially over short periods. These stocks may also be more expensive in relation to their profits than the market in general. Consequently, growth stocks may react with more volatility to variations in profit growth.

The objective of the Portfolio may be to amplify market movements, which results in a higher-than-average volatility.

The Portfolio Manager may temporarily adopt a more defensive approach if it considers that the equity market or economy of the countries in which the Portfolio invests is experiencing excessive volatility, a persistent general decline, or other unfavourable conditions. In such circumstances, the Portfolio may be unable to achieve or pursue its investment objective.

The Portfolio may invest in companies making an initial public offering. In such cases there is a risk that the price of the newly floated share is more volatile due to factors such as the absence of previous trading, unseasonal transactions and the limited number of securities available for trading.

f) Legal Risk:

The Portfolio may be affected by the actions of governments and regulatory bodies. Legislation could be imposed retrospectively or may be issued in the form of internal regulations which the public may not be aware of. Legislation (including legislation relating to tax) or regulation may be introduced which inhibits the Portfolio from pursuing their strategies or which renders an existing strategy less profitable than anticipated. Such actions may take any form, for example restrictions on investment strategies in any given market sector (for example restrictions on short selling in the financial sector) or changing requirements (for example increased disclosure to market) and may be imposed without prior warning by any regulator.

g) Inflation Risk:

Over time, yields of short-term investments may not keep pace with inflation, leading to a reduction in the investors' purchasing power.

h) Taxation Risk:

The value of an investment may be affected by the application of tax laws, including withholding tax, or changes in government or economic or monetary policy from time to time as may be applicable to specific clients. As such, no guarantee can be given that the financial objectives will actually be achieved. The tax information described in this Disclosure Document is as available

under the prevailing taxation laws. This could be changed at any moment by regulation. Further, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the specified Portfolio as applicable to specific Clients will endure indefinitely.

i) Valuation Risk:

This risk relates to the fact that markets, in specific situations and due to lack of volumes of transactions, do not enable an accurate assessment of the fair value of invested assets. In such cases, valuation risk represents the possibility that, when a financial instrument matures or is sold in the market, the amount received is less than anticipated, incurring a loss to the portfolio.

j) Operational Risk:

Operational risk addresses the risk of trading and back office or administration issues that may result in a loss to the Portfolio. This could be the result of oversight, ineffective securities processing procedures, computer systems problems or human error. There could also be risk associated with grouping of orders. For instance, at the time of placing the trades, the portfolio manager shall group orders on behalf of all clients managed by him, provided it is unlikely to be detrimental overall for any of the clients whose orders have been included. However, such grouping may have a detrimental effect to the client compared to the execution of an individual order for the client. Some markets may be less regulated than most of the other international markets, hence, the services related to custody and liquidation for the Portfolio in such markets could be more risky.

k) Specific Risk Factors pertaining to Exclusive Portfolio

Subject to the stated investment objective, since this is a relatively concentrated investment strategy, if the selected stocks do not perform as expected by the Portfolio Manager of the portfolio, the portfolio's performance may be adversely affected due to a risk associated with low diversification. As the portfolio intends to make concentrated investment in stocks with limited degree of diversification, portfolio may be overweight on those stocks which may impact performance negatively to a considerable extent and hence, the benchmark index provided herein may or may not be outperformed. Further, the Portfolio may be more sensitive to economic, business, political or other changes and this may lead to sizeable fluctuation in the value of the Portfolio.

l) Specific Risk Factors pertaining to Thematic Sector Select Portfolio

Subject to the stated investment objective, since this is a relatively concentrated investment strategy, if the selected sectors do not perform as expected by the Portfolio Manager of the portfolio, the portfolio's performance may be adversely affected due to a risk associated with non-diversification. As the portfolio intends to make primary investment in stocks of companies in a few select sectors, therefore portfolio could be concentrated or may be overweight on those stocks which may impact performance negatively to a considerable extent and hence, the benchmark index provided herein may or may not be outperformed. Further, the Portfolio may be more sensitive to economic, business, political or other changes and this may lead to sizeable fluctuation in the value of the Portfolio.

m) Investment Risk for Portfolio Manager and/or its employees transactions

The client also has concern where the transactions of purchase and sale of securities by portfolio manager and/or its employees (who are directly involved in investment operations) may be in conflict of interest with the transactions of the client's portfolio. In such a case, the clients are requested to refer to the disclosure made by the portfolio manager as the portfolio manager is required to disclose such instances where conflict of interest in the transactions are found.

n) Disclosure of conflict of interest for services offered by group companies of the portfolio manager

DRChoksey group comprise of various company's having different SEBI registrations wherein some of the services required under the Portfolio Manager regulations may be offered by the group company / registrations. Thus it is hereby disclosed that certain services as required under the Portfolio manager working may be provided by such group companies and all care would be taken to see that there is no conflict of interest related to the services being offered by such group companies. However, in case of any conflict of interest the disclosure for the same would be made in the Disclosure document as required.

11) Audit Observations

Observations found during last 3 years of Audit: - Reversal of management fees done for few clients.

12) NATURE OF EXPENSES

The Portfolio Manager may charge fees and expenses connected with managing the portfolios. The exact nature of these fees and expenses would form part of the Client Agreement. The fees and expenses could vary depending on the asset class / type of portfolio and not all these fees may apply to all portfolios.

1. Management fees and Performance fees

The portfolio manager would charge either fixed fee or percentage based management fees on average daily assets under management or performance linked fee or combination of all for providing portfolio management services as agreed in the client service agreement.

Management Fees:

The portfolio manager would charge fixed management fees or percentage based management fees ranging from 0.5% to 5% per annum on average daily assets under management on quarterly basis for providing portfolio management services as agreed in the client service agreement.

Performance Fees:

The Portfolio Manager shall charge performance based fees annually ranging from Nil to 20% on increase in portfolio value in excess of the previously achieved highest value (high watermark principle) and a 8% hurdle rate. High Water Mark shall be the highest value that the portfolio/account has reached after reducing performance fees recovered from asset under management.

2. Custodian & Fund Accounting fee:

The charges relating to opening and operation of dematerialized accounts, custody and transfer charges for shares, bonds and units, dematerialization and other charges in connection with the operation and management of the depository accounts. For Resident Indian clients as well as Non-Resident Indian and Foreign clients, a custody fee as mentioned in the agreement shall be charged. These are current rates of charges, but may vary in future depending on the fees that may be charged by the Custodian from time to time. Custody fees would be subject to applicable taxes at prevailing rates.

3. Registrar and transfer agent fee:

Charges payable to registrars and transfer agents in connection with effecting transfer of Securities and bonds including stamp charges cost of affidavits, notary charges, postage stamp and courier charges to be paid by the Client.

4. Early Exit Termination Fees

Early exit /termination fees may be charged depending on the period of holding of the investors as may be mutually agreed between the Client and Portfolio Manager from time to time.

5. Brokerage and transaction cost:

Brokerage and related transaction costs (e.g. other taxes and charges including exchange charges, etc.) are part of the acquisition cost / sale realization. These costs are charged at actual to the portfolio. Applicable Securities Transaction Tax (STT) will be charged separately.

6. Demat charges:

Demat charges are payable as per DP plan at actual as charged by the depository participant to the client's accounts

7. Bank charges:

Bank charges are payable at actual as charged by the bank and / or depository participant.

8. Certification and professional charges:

Charges payable for outsourced professional services like accounting, auditing, taxation and legal services etc. for documentation, notarizations, certifications, attestations required by bankers or regulatory authorities including legal fees etc.

9. Stamp Duty:

Stamp duty are payable at actual rates.

10. Administration cost:

Total Administration cost would be at the prevalent applicable rates.

11. All other costs, fees, charges and expenses incurred by the Portfolio Manager or any other person appointed by the Portfolio Manager arising out of or in connection with or in relation to the management, acquisition, holding, custody, sale and/or transfer, of the Assets or the rendering of the Portfolio Management services or the performance of any act pursuant to or in connection with the Client Agreement shall be paid or reimbursed by the Client.

13) TAXATION

1. All or any Taxes payable on any transaction entered into or undertaken by the Portfolio Manager on behalf of Investors or with respect to any Securities, whether by way of deduction, withholding, payment or otherwise, shall be fully borne by Investors. Payment of the Taxes shall be the personal responsibility and liability of the Investors. The Portfolio Manager is not required, to discharge any obligation on behalf of any Investor to pay any Taxes payable by such Investor. If, however, the Portfolio Manager to any tax authority on behalf of an Investor pays any Tax, that Investor shall reimburse the Portfolio Manager for the same. The Portfolio Manager shall have an unconditional and irrevocable authority to deduct or appropriate the same from any amount or Securities held by the Portfolio Manager on behalf of the Investor.
2. Subject to applicable taxation laws, in force from time to time, the Portfolio Manager may at its own accord deduct the required amount of Tax at source while effecting disbursements / payments of amounts interim or otherwise to an Investor.
3. Prospective Investors are advised to consult their tax practitioners with respect to tax consequences that may be faced by them on account of their participation in any of the Strategies of the Portfolio Manager. The Portfolio Manager shall not be responsible for assisting or completing the fulfillment of the obligations of an Investor. Wherever required by the relevant Act, rules and regulations, tax will be deducted at source by the Portfolio Manager. The obligation of paying Advance Tax installment shall lie on the Investors.
4. If the Portfolio Manager deals in shares, securities etc. on average basis for its PMS Clients, the Securities Transaction Tax charged by broker in its contract shall be apportioned among its concerned PMS Clients based on transaction value or any other appropriate basis, and will be informed to the concerned PMS Clients along with transaction details/other details. Based on the documents and as per advice of PMS Client's tax advisor, the Client shall claim applicable tax benefit under Income Tax Act, 1961. In case, the Client does not get tax benefit under Income Tax Act, 1961, the tax liability will be entirely borne by the Client only.

14) ACCOUNTING POLICIES:

1. Significant Accounting Policies

1.1. Basis of Accounting

The financial statements are prepared on the accrual basis of accounting, under the historical cost convention, as modified for short term investments when marked to market, as applicable. The significant accounting policies are drawn in accordance with SEBI (Portfolio Managers) Regulations, 2020, as amended, Disclosure Document submitted to SEBI and generally accepted accounting principles read together with the SEBI (Mutual Funds) Regulations, 1996, as amended.

1.2. Capital

Capital represents Capital contribution by the client as adjusted by any income/loss for the year (net of repayment, if any) in accordance with the Portfolio Management Agreement.

1.3. Investments

Accounting for Investment transactions

Purchase and sale of Investments are recorded on the date of the transaction, at cost and sale price respectively, after considering brokerage, other transaction costs, if any.

Valuation of investments

Investments are valued at the closing market prices of Bombay Stock Exchange or National Stock exchange as the case may be.

1.4. Revenue recognition

Dividends from investments are recognized on accrual basis.

Gains or Losses on sale of investments are determined on the basis of the cost arrived on first in first out ("FIFO") method basis.

1.5. Expenses

All expenses are accounted for on accrual basis.

Management fees (including administrative fee) are accrued in accordance with the Portfolio Management Agreement entered into with the client and amendments to the Agreement in accordance with the Securities and Exchange Board of India circular (No. SEBI/HO/IMD/DF1/CIR/P/2020/26) dated February 13,2020 ("circular").

2. Provision for Personal Income Tax

Provision for Income tax has not been made in respect of the income reported in the profit and loss statement during the year since the liability to pay applicable taxes is the Client's sole responsibility.

3. The accompanying schedules are integral part of this balance sheet and profit and loss statement.

15) INVESTOR SERVICES

1. Name, address and telephone number of the investor relations' officer who shall attend to investor queries and complaints.

Name : - Mr. Pinac Shanghvi
 Address : - 5th Floor, Abhishek Building, Behind Monginis Cake Factory, Off New Link Road, Andheri (W), Mumbai 400 053
 Telephone : - 022-66965555
 Email : - pms@devenchoksey.com

2. Grievance redressed and dispute settlement mechanism.

i) Any and all disputes arising out of or in connection with the provision of services as a portfolio manager shall be settled by arbitration by a single Arbitrator to be appointed by DRChoksey. The arbitration shall be held, in Mumbai in accordance with the provisions of the Arbitration and Conciliation Act, 1996, as amended from time to time.

ii) In the event of any complaint, investor can approach us and if you are not being satisfied with our response, you can lodge the complaint online. Therefore, you should know whom you should turn to, to get your complaint redressed. SCORES facilitates you to lodge your complaint online with SEBI and subsequently view its status.
